

Reliable. Proven. Trusted.

Natus Cranial Access Kits allow for access to the subarachnoid space or the lateral ventricles of the brain. Our kits are intended to be used with an external drainage and monitoring system in selected patients to reduce intracranial pressure, to provide temporary drainage of CSF and to monitor ICP.

Cranial Access Kits are available with or without drugs and with a variety of drill bits and instrumentation. All kits are convenient, pre-packaged sterile sets containing all necessary components for entry into the cranium.

All Natus Cranial Access Kits include:

Kit Part #	Description
HITH1	Kit with drugs, 2 drill bits, no razor
HITHRZR	Kit with drugs, 2 drill bits, razor
HITHND	Kit with no drugs, 2 drill bits, no razor
HITHNDRZR	Kit with no drugs, 2 drill bits, razor
HITHLT	Kit with drugs, 5.31 mm drill bit, no razor
HITHLTRZR	Kit with drugs, 5.31 mm drill bit, razor
