

July 1, 2020

Dear Valued Customer:

Natus is announcing the release of NeuroWorks/SleepWorks 9.2 (GMA 2)

We are pleased to announce the release of a software update for NeuroWorks and SleepWorks. NeuroWorks/SleepWorks version 9.2 GMA 2 is an enhancement that includes usability improvements as well as considerable additional functionality.

Key updates and new functions include:

- **Physiologic Monitoring Integration options**
- **Advanced Trending licenses allowing for significantly more trending choices**
- Trending workflow improvements
- New analyzer and trending profiles readily available when starting a new study
- Report improvements
- Export tools to meet the needs for Research projects
- Upgrade to TLS 1.2 Security protocol

All customers who currently have NeuroWorks/SleepWorks version 9.x are entitled to a free software update to 9.2 GMA 2. If you own an older NeuroWorks/SleepWorks version, you will need to purchase NeuroWorks/SleepWorks 9.2 GMA 2 as an upgrade.

For download links please contact our Technical support department at 1-800 387-7516 or email Oakville_Technical_Service@natus.com for support. As always, your local Natus sales representative is available to discuss the new software features and benefits.

Thank you for being our healthcare partner!

Sincerely,

Natus Marketing
