1. Introduction

This document describes known issues and validated compatible Microsoft Windows updates for Neuroworks/Sleepworks products. Microsoft Windows updates for desktop operating systems are validated when a new desktop image is created by Natus. Microsoft Windows updates for server operating systems are not routinely validated. Customers can apply "Important" updates released by Microsoft that have not yet been validated by Natus but may be asked to remove these updates when Natus suspects a conflict. Natus is not responsible for the management and maintenance of Microsoft Windows updates on customer computers.
