

Give your babies the comfort of oral care with the gentle foam tip **OraSwab** applicator.

Babies enjoy it

Caregivers report that babies enjoy the gentle swabbing action. Oral care takes only a few minutes to administer at touch time, once per shift, or as needed. (Be sure to follow your hospital protocol.) In addition, it provides an excellent opportunity for proactive family involvement when family, staff and baby are ready. Parents often are able to perform the oral care protocol and feel involved in their baby's care.

- Foam tip applicator is soft, safe and absorbent for your oral care applicator needs
- Available in two convenient sizes:
 - Extra-small 6mm wide and
 - Small 9mm wide
- Intended use is general cleaning and removing bacteria with solution
- Cotton under the foam provides extra absorbency

Using OraSwab is safe and simple!

Comfortable oral care

Combined foam and cotton tip for extra absorbency
