

YOUR PARTNER IN NEWBORN SCREENING

COST REDUCTION AND PROCESS IMPROVEMENT SOLUTIONS

HEARING

Peloton screening services have already helped hospitals around the country enhance their hearing screening programs with:

- Proven screening technology
- Dedicated and experienced personnel
- Efficient reporting and tracking

Best-in-Class protocols and quality assurance result in improved screening programs timely state reporting and follow-up, enhancing patient care.

CONGENITAL CYTOMEGALOVIRUS (cCMV)

Peloton is now partnering with hospitals to facilitate saliva collection for babies who refer their hearing screening.

CRITICAL CONGENITAL HEART DEFECTS (CCHD)

Peloton reduces the demands on hospitals and parents by performing CCHD screening at the same time as hearing screening.

PELTON HAS EXPANDED SERVICES TO INCLUDE cCMV AND CCHD SCREENING

HEARING

Using the Gold Standard in Hearing Screening – ALGO® AABR® Technology

- Highest clinically proven: sensitivity > 99% and specificity > 97%
- Validated in controlled, randomized, multi-center clinical studies
- Over 25 Years of quality and dedication

PELTON PROVIDES

SINGLE POINT OF CARE	improving family satisfaction
STREAMLINED WORKFLOW	improving efficiency of care
AGGREGATE DATA	improving hospital and state reporting
QUALITY METRICS	providing opportunities for continuous improvement
ALL EQUIPMENT	reducing demands on hospital budgets
DEDICATED STAFF	reducing demands on staff & improving efficiency

cCMV

As the most common viral infection affecting newborns, cCMV can cause permanent disability if not detected early.²

- Targeted cCMV screening and education is becoming a standard of care
- Peloton obtains a saliva sample immediately after hearing screening for timely processing
- Single point of care provides comfort and minimizes interruptions of baby and family time together

NOW...OFFERING NEW TESTS TO PROVIDE DISCHARGE EFFICIENCIES AND ENHANCED FAMILY EDUCATION.

CARE COORDINATION MEANS THE FAMILY AND MEDICAL HOME HAVE THE INFORMATION NECESSARY TO MAKE TIMELY CARE DECISIONS.

CCHD

Using State-of-the-art Masimo® equipment

- CCHD is now an integral part of the Recommended Uniform Screening Panel (RUSP) for all newborns¹
- CCHD screening at the same time as hearing screening minimizes baby disruptions while allowing reallocation of valuable nursing time
- Enhanced parent education and in-room screening provides conducive environment for family-centered care that contributes to patient satisfaction

All Peloton screening service workflows are customized to meet hospital protocols.

Contact Peloton to learn more about how one or more of the available screening services can help improve efficiency, compliance with state requirements and patient satisfaction.
