

The next best thing  
to being there

# The next generation NICVIEW<sup>®</sup> 2

**HD Video  
Quality**

**Touchscreen**

**App-based  
Access**

**Upgrade-  
ready**

# Natus, placing families at the center of newborn care

Childbirth is an emotional event for parents and families, particularly when a newborn's first few critical days, weeks or even months are spent in the NICU. 24/7 video streaming with NICVIEW 2 helps families feel more involved right from the start, making them partners in the process of giving their hospitalized family member **the best start in life.**

## Actively Supporting Mother-Baby Bonding

**Video streaming on demand** helps reduce the anxiety mothers can feel being separated from their newborn. The visual stimulus supports the mother-baby bonding process and has the potential to assist with milk flow during breastmilk expression while mother and baby are separated.<sup>1,2</sup> Family can watch and learn their newborn's routines in the NICU, helping smooth the transition to life at home.

## Builds Trust in the NICU

**Small and clean design,** NICVIEW 2 can be turned on/off and repositioned at will, so that NICU staff remain in control of the care process at all times. Parents see their newborns receiving the best possible care, creating trust and confidence in the NICU staff.

## Protecting Privacy

**NICVIEW 2 is exceptionally user-friendly,** with HD web-based video for real-time streaming on any online device via a standard downloadable app.

**Privacy is paramount.** Password-protected access ensures parents can view only their newborn. With end-to-end encryption and SSL authentication, parents enjoy the same degree of privacy as they do at home.

## Building trust and enhancing care

### 24/7 Video Streaming

- HD video with best available resolution
- Excellent low-light performance for clearer imaging

### User-Friendly

- Direct app-based access (Android and iOS) from any end device
- Simple, secure, sign in access through an App
- Designed for families and relatives of any age, in any location

### Full NICU Control

- NICU staff determine camera positioning and viewing times
- Minimal footprint and seamless integration into NICU workflow

### Bank-Level Security

- End-to-end encryption and SSL authentication
- Parental access limited exclusively to their own newborn

### Future-Proof

- Flexible software platform ready for future evolutions
- App-based access eliminates need for hospital server
- 24/7 customer and technical support for families and clinical staff
