

## Glucose blood draws made quicker and easier

Wish you could draw just a single drop of blood for glucose tests? Now you can – with the SugarPlum glucose lancet.

- The same lancet style used for adult glucose tests – but sized for babies
- Two controlled depths:
  - 1.0mm depth for micropreemies to full-term babies
  - 1.8mm depth for full-term babies and adults
- Sterile, single-use needle retracts and locks after use

## SugarPlum and NeatNick® – perfect companions for all your babies' blood draws!

Use SugarPlum for glucose tests that require just a drop of blood. Use our NeatNick sweeping blade lancet for PKU's, CBC's, and other tests. With NeatNick and SugarPlum you can choose the right lancet for all your babies' blood draws.

SugarPlum's simple design makes glucose draws quicker, easier and more comfortable for your babies. Press against the heel – SugarPlum automatically fires at the correct pressure. Before and after firing, the needle is safely concealed in the plastic body.

### Using SugarPlum is safe and simple!

- 1** Remove protective cap.
- 2** Place the raised red platform end of lancet on the site
- 3** Gently press down to activate the lancet

### NeatNick heel lancets

Preemie lime green

Full-term mango orange

### Ordering Information

SugarPlum glucose lancet and NeatNick sweeping action heel lancet are sterile, single-use disposable "sharps" used to puncture an infant's heel for collecting a blood sample and are DEHP-free, BPA-free, and not made with natural rubber latex. See instructions for use.
