

February 2022

To: Valued Natus Customers

SUBJECT: Coronavirus Update

Dear Valued Natus Customer,

The coronavirus (COVID-19) pandemic continues to impact local and global health and related economies. We at Natus are constantly monitoring the situation closely to assess any impact on supply and daily operations.

Product Availability:

Natus sources and supplies products and components to and from locations around the globe that are impacted by the virus. We have been and will continue to actively manage the situation to minimize any impact through regular direct communications with our suppliers and logistic partners. Our teams are working through the product availability and component cost challenges. We have been proactively communicating with our suppliers and logistic partners to ensure they continue to support Natus and our customers to minimize any impact to our operations.

Service and Support:

Natus is committed to providing excellent customer service and support. While they are loosening around the world, our Service team continues to navigate the evolving restrictions imposed by COVID-19 to maintain the same levels of service and support to our customers. We have been able to provide uninterrupted hotline support through our established customer service and technical support teams, and will continue to provide in-person engagement when necessary, compliant with local, state and national governmental and customer guidelines. In addition, we are providing virtual support whenever possible in the interest of minimizing customer and employee contact and potential exposure.

Cleaning and Disinfection:

Recommendations for cleaning and disinfecting Natus equipment are included in the product Instruction for Use (IFU). Please refer to this information as you implement efforts to control the spread of COVID-19 in your facility.

Thank you for your understanding and cooperation as we monitor and navigate this important global health issue.

Best Regards,

Natus Medical Incorporated
