Document Description

The document describes how to solve the problem when the Bone is greyed out in the control panel and not possible to select.

1. “Bone” is greyed out and not possible to select.

2. Go to “Tools” and click on the “Configuration Wizard”.

![Image of the control panel showing the Configuration Wizard option]
3. Click on Audiometry “Configure”.

4. Highlight (marked with blue) the Astera to connect, and click “Finish”.
5. Click “Next”.

6. Change the Bone-oscillator placement "Forehead" to "Mastoid".
7. Now it’s possible to select “Bone” in the control panel.
